

How to make a Bee Finger Puppet

Body - Colour in black and yellow stripes and cut out the finger holes. (Ask an adult to help)

Wings - Decorate the wings. You can draw a pattern on them, colour them in or just leave them plain... it's up to you. Using scissors, cut them out and stick them on the back of the body. Look at the picture for guidance.

Head - Colour the head black or yellow, leaving the eyes and mouth white. Cut out the head and stick it to the body. If you have a pipe cleaner or some wool, you can stick these on as antennae. Otherwise, use the shapes provided below.

Lady Bird Finger Puppet Templates

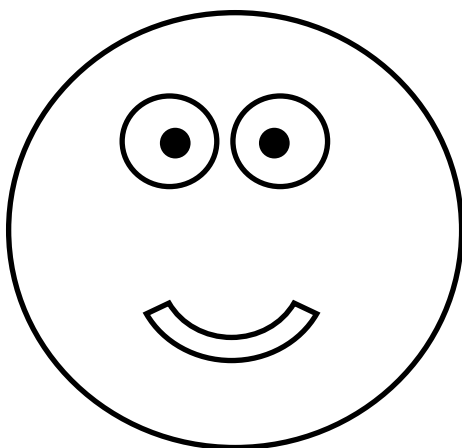

Body - Colour this black and cut out the finger holes. (Ask an adult to help)

Wings - Colour this red and cut along the dotted line to make the wings.

Stick the wings on top of the body at an angle, so the lady bird looks like it's flying! (Use the picture as a guide.)

Head - Colour the head black, leaving the eyes and mouth white.

Cut out the head and stick it to the body and wings.

If you have a pipe cleaner or some wool, you can stick these on as antennae.

Otherwise, use the shapes provided below.
